Total Profit 3019

These are the calls given by us in this week. The column of lot size shows the number of shares which the investor would have bought or sold if he would have taken an exposure of Rs 1,00,000 in all our calls. Assuming that the investor takes an exposure of Rs 1, 00,000 in all our calls the total profit in the last week excluding brokerage would have been approx Rs 3019.

This file is being sent because at the end of the day your client may complaint that he has incurred a loss because he traded in only 2 calls out of 5 and those 2 calls got triggered. So the motive of sending this file is to convince the clients to trade in equal exposure in all the calls so that they ultimately gain. Working in only selected calls will ultimately lead to losses because 100% accuracy is impossible for any broking house while generating calls.
